

# Front-end Developer Candidate Exercise

## News Search and Reader Functional Prototype

### Success Criteria

1. Based on the included data file, user can view a listing of all articles.
2. Users can select an article from the list to view the metadata provided in the data file, in a details pane and the entire news article page (probably in an iframe).
3. The layout and appearance of the functional prototype should adhere to the design mockup as closely as possible.

### Assumptions / Instructions

- There are no authentication / authorization requirements for this app
- Design mock-up location - <https://massmutual.invisionapp.com/share/YMBHFPOTF>
- UI / UX improvements should be made and include your reasoning the README.md file.
- Use external libraries as sparingly as possible. We want you to keep it simple and show your understanding of the task by using your own solution. Keep it simple!
- Use of a CSS Pre-processor (e.g. Sass, Less) is recommended.

### Environment

- Deliver ALL code and assets in a zip file.
- Include README.md with instructions to run the code so we can review your work.

### Rough Agenda / Timeline

- Interviewee should be prepared to discuss / review their implemented design
- Artifacts are at the discretion of the interviewee
